

## Our Vision

To ensure a high-quality, high-expectation qualification that provides contemporary, relevant, and challenging learning opportunities for all students reflecting the knowledge, skills, and understanding acquired by them to engage in a technology and information rich global community.

## Our Priorities

### Partnerships and Engagement

- Build and maintain partnerships with stakeholders including education sector leaders.
- Consult with students, teachers, principals, parents, and representative stakeholder groups.
- Enhance student awareness of their academic rights and learning responsibilities.
- Support the future directions of the ACT Government.

### Curriculum

- Refine and develop curriculum that is high quality, and contemporary, adaptable, responsive, and broad and deep.
- Build teacher capability through supporting quality teacher judgements, aligning practice, and promoting accuracy and consistency.
- Guide schools in the development and implementation of assessment that is challenging, relevant, valid, and reliable.

### Certification

- Maintain and enhance quality assurance systems that produce evidence-based, accurate, and reliable assessment data.
- Oversee systemic quality assurance methodologies that are standards based and consistent; expert and constructive, and improvement focused.
- Refine and develop certification processes and technology solutions that are stable, functional, accessible, and accurate.
- Provide robust statistical processes, and scaling protocols and procedures.
